

GoMeetNow Conferencing From GreenAppX

GoMeetNow TurboMeeting is a premier web-based conferencing solution that meets the needs of any size organization. With multi-platform support and no complicated software to download and configure, you'll be conducting on-demand reservationless meetings online collaborating on projects with employees, customers and vendors instantly.

Application Features Include:

- Easy to use web-based host and participant consoles
- No special software to download and configure – 5 second conference login
- Total cross-platform support
- Present and control remotely
- Application sharing
- File transfer
- Chat
- Desktop Sharing
- Collaborative Whiteboard
- Free toll call audio conferencing – toll free numbers available
- Record all screen and audio during conference

100% attendance by a browser only is a capability that has been demanded since the day that web conferencing started. Today, RHUB presents the first truly universal attendance web conferencing solution.

- Your meeting attendees do not need to download any kind of software, no Java Applet, no Flash and no documents.
- As long your attendees can view Google/Yahoo maps with their browsers from any of the platforms: Windows, Windows Mobile, Mac, Linux, UNIX and iPhone, they can join your meetings and see your presentation.
- Joining a meeting is as easy as typing a URL and as fast as 5 seconds depending on your attendees' Internet connection speed.

GoMeetNow TurboMeeting Bundles

Enhance your GoMeetNow application by bundling additional functionality

- SharePoint as a company intranet
- Hosted Microsoft Exchange Server
