

Service Description

WebEx WebConferencing: Easy to use, but robust enough to meet security and performance demands of enterprise IT. Whether you're a business of one or a global enterprise with offices around the world, WebEx has secure, dependable web conferencing services to meet your needs.

WebEx hides the complexities from the user so you don't need to worry about ports, platforms, versions, or firewalls. All

Customer Benefits

- Meet online from anywhere: WebEx services are hosted, also known as "on-demand." You can start and attend meetings wherever you are—in a client's office, at an Internet café, or from home—anywhere you have an Internet connection.
- Keep your meetings private: There are multiple layers of security within the WebEx platform. With password-protected and encrypted meetings your online meetings are totally secure. WebEx is the only web conferencing provider to have earned both WebTrust and SAS70 certification.
- Count on always-on performance: Once you begin hosting online meetings, you'll need a service that is always on and always available. WebEx has built its infrastructure with excess capacity to handle peak demands and delivers 99.99% uptime across the system.
- WebEx online meeting services are totally scalable: Handle meetings of two or two thousand attendees with equal ease. Our private global network delivers those meetings at top speed anywhere in the world so you can count on high performance wherever you are and however much your company grows.
- Integrate web conferencing into your business: Web conferencing can help you meet your goals across your organization. Our remote support applications give you remote desktop access to support both internal users and remote customers.
- WebEx is integrated with many standard business applications, including Microsoft Outlook making web conferencing just another part of your daily workflow.
